

Handy Info Sheet 1: Bottle clearance distances

<input type="checkbox"/>	Gas leak at regulator	<input type="checkbox"/>	Access to bottles difficult	<input type="checkbox"/>	Bottle chains missing
<input type="checkbox"/>	Leaking hose	<input type="checkbox"/>	Too many steps	<input type="checkbox"/>	Bottle location issue
<input type="checkbox"/>	Driveway too steep, slippery	<input type="checkbox"/>	Source of ignition too close to bottles	<input type="checkbox"/>	Chain not fixed securely
<input type="checkbox"/>	Uneven surface	<input type="checkbox"/>	Drain/door/window vent too close to bottles	<input type="text" value="Other"/>	
<input type="text"/>					

Legal minimum clearances required when positioning two 45 kilogram Contact Rockgas LPG bottles

Bottle distances from ignition sources

Visit lpga.co.nz and pgdb.co.nz for information on the industry code of practice.

If you've got any concerns, call us on **0800 762 542**.

Note: NZ Regulations require a Location Test Certificate to be issued for sites with more than 100kg of LPG (ie more than 2 x 45kg bottles)
